

## **Aftercare instructions tattoo**

- A tattoo is a wound, if you take good care of it, it will be completely healed (above and below the skin) after about 6 weeks.
- If the tattoo was covered with a film after it was set, you may remove it again after 3 hours.

### **-Take care of your tattoo as follows:**

- Wash your tattoo 2x a day with a neutral, unscented soap. (Also called soap without soap)
- Pat your tattoo dry with a clean towel or quality kitchen paper.
- Apply a thin layer of tattoo recovery cream to your tattoo about 4 times a day.
- Always wash your hands before touching the tattoo during the healing process!!
- Do NOT scratch off the scabs or skins! These will come off automatically when you apply the tattoo recovery cream..
- Avoid too tight clothing on the tattoo wound.
- Cover your tattoo with cling film only the first night, then no more unless you are employed in a very dusty environment (construction site, etc.)
- Showering with your tattoo is definitely allowed, so this is allowed the same day already.
- Soaking in water (bath) is NOT allowed for the first 3 to 4 weeks.
- Saunas, steam rooms, pools and tanning beds are also NOT allowed for the first 4 weeks.
- The tattoo should NOT be exposed to sunlight for the first 4 weeks!
- To preserve the color and result of your healed tattoo, we recommend that you always apply factor50 sunscreen to your tattoos!

### **We always recommend the following aftercare products:**

- **Cirusso Aftercare Cream** (cream)
- **Cirusso Aftercare Soap** (soap)

*\*If you do use other products when taking care of your tattoo, we are not responsible for any consequences of this and/or poor healing of your tattoo.*
